Printing Tips

If you want to print a range of pages:

1. In Acrobat Reader, open the PDF book to the first page that you want to print.
2. Select View -> Thumbnails and Page to display Thumbnails.
3. Check the Thumbnails for the number of the open page. The page number will appear highlighted on the Thumbnail page.
4. Open the last page that you want to print and determine the page number from the corresponding Thumbnail page.
5. Select File -> Print, enter the page range, and choose OK.

If your printer does not print graphic elements:

Check your printer driver and make sure you are using a PostScript driver. Some printer drivers may not print the graphic elements or special fonts used in the Ascend documents.
